TRANSITIONAL-CONTEMPORARY REDESIGN · CONCEPT A

Maplewood Villa

The Maplewood, redrawn as a transitional-contemporary villa. It keeps the 50-ft lot and the two-car garage, and gains a calmer plan: one line of sight from the front door to the garden, fewer and larger rooms, no angled walls, and a façade of limestone, lime stucco, oak and black steel.

3,330	+1,375	4–6	3.5 + 1	42 × 52
SQ FT ABOVE GRADE	SQ FT FINISHED LOWER LEVEL	BEDROOMS	BATHS	FT FOOTPRINT, 50 FT LOT

One axis

The front door, the gallery and the great room's west French door sit on one line. You see the garden from the doorstep.

Fewer, larger rooms

Living, family, breakfast and dining collapse into a 20-ft great room and a kitchen that seats ten. Each room keeps its own centreline.

No angled walls

The original's 45° walls are gone. Every wall is orthogonal, so furniture, millwork and ceilings line up.

Tall, low, tall

A 20-ft foyer, a 10-ft gallery, then the 20-ft great room. The lower ceiling between them makes both tall rooms feel taller.

A service spine

Garage, mudroom, scullery, kitchen. Groceries and boots never cross the formal rooms.

Honest materials

Honed limestone, white lime stucco, rift oak, black windows and standing-seam metal. Five materials, used the same way on every face.

Main floor

1,680 sq ft · 10-ft ceilings

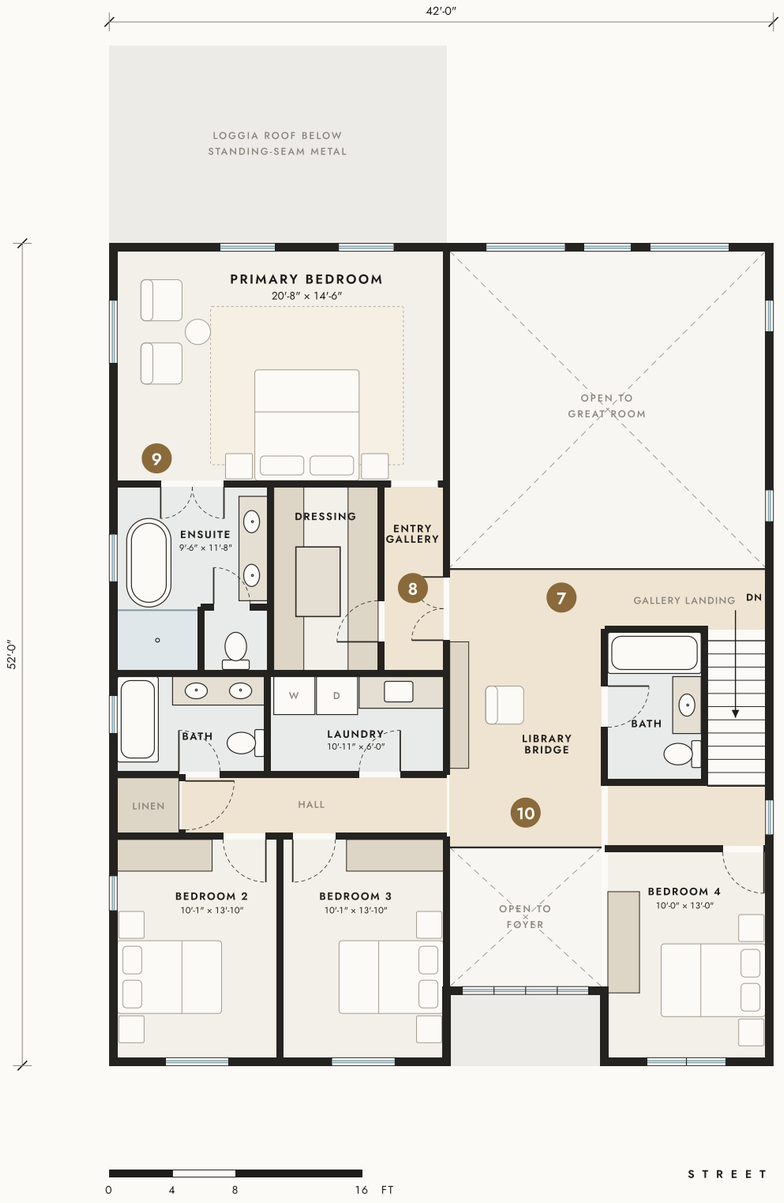

A-101

Second floor

1,650 sq ft · 9-ft ceilings

A-102

MAIN FLOOR

1 PORTAL AND FOYER
A two-storey limestone portal replaces the narrow porch. Inside, a 20-ft foyer steps down to a 10-ft gallery, then opens into the great room.

2 GREAT ROOM
20 ft wide with a 20-ft ceiling. Three glazed bays face the garden; the west French door sits on the front-door axis. A gallery landing overlooks it from above.

3 KITCHEN AND DINING
One 20′-8″ room facing the loggia. A 10-ft island looks at the garden, and the range is centred under a plaster hood between a fridge column and the scullery door.

4 SERVICE SPINE
Garage to mudroom (lockers, bench) to a walk-in scullery with a second sink and dishwasher, then the kitchen.

5 STAIR CORE
An L-stair with a landing window, open to the gallery. The powder room and the basement stair sit behind it, off a short back hall.

6 HEARTH WALL
A linear gas fireplace in a limestone surround, flanked by built-ins and two narrow windows: one symmetrical composition.

SECOND FLOOR

7 GALLERY LANDING
The stair arrives at a balcony over the great room. It continues as a library bridge with built-in shelves, overlooking the foyer.

8 PRIMARY ENTRY
Double doors open into an entry gallery and dressing room, so the bedroom is never seen from the hall.

9 PRIMARY BEDROOM
The bed faces two garden windows. The ensuite has a freestanding tub at the window, a 5-ft walk-in shower, a separate WC and a double vanity.

10 BEDROOMS 2–4
Three ~10 × 13 ft bedrooms, each with its own closet. Bedrooms 2 and 3 share a double-vanity bath; bedroom 4 has the bath beside it. Laundry moves upstairs.

MATERIALS

HONED LIMESTONE
Portal frame, garage base, plinth, loggia columns

WHITE LIME STUCCO
Main walls; smooth float finish

RIFT WHITE OAK
Pivot door, carriage door, portal lining

CHARCOAL STANDING SEAM
Roofs and canopies, 16″ pans

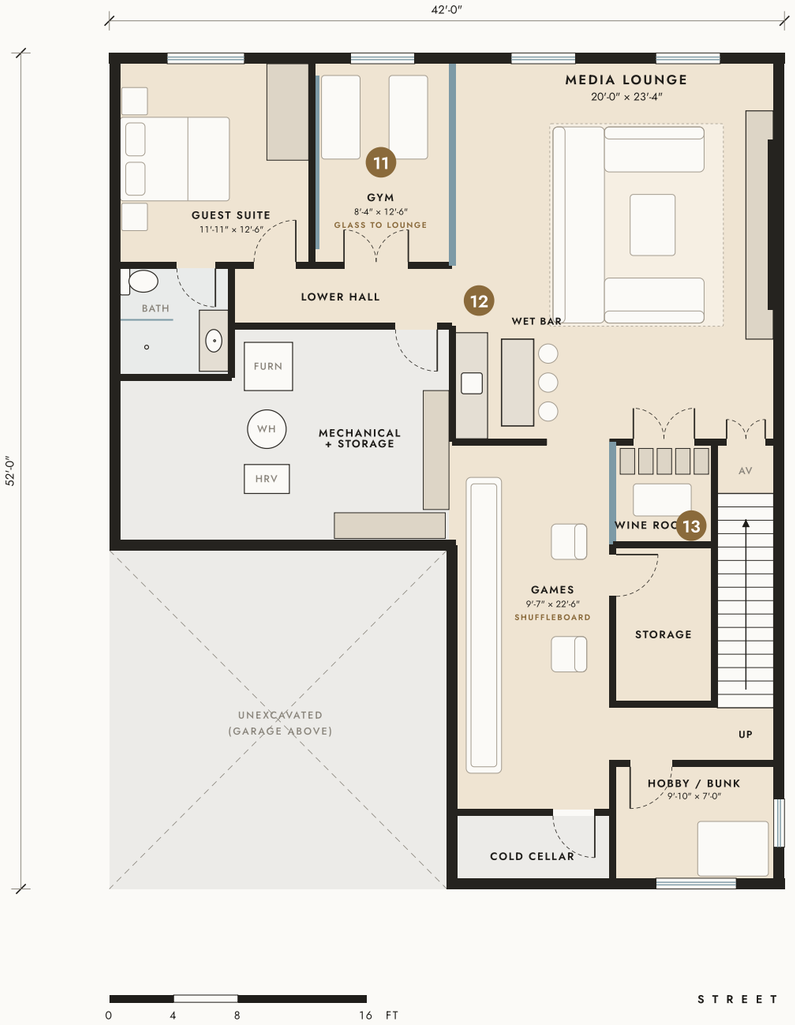

BLACK ALUMINUM-CLAD
Windows and doors, slim sightlines

AGED BRONZE
Spandrels, lanterns, hardware

Lower level

1,375 sq ft finished

WHAT CHANGED

	MAPLEWOOD (2026 BROCHURE)	MAPLEWOOD VILLA
Arrival	Small porch tucked beside a projecting garage	Two-storey limestone portal, 20-ft foyer, view straight to the garden
Living rooms	Living + family (both open to above), separate dining and breakfast	One 20-ft great room, a kitchen that seats 10, a study
Kitchen	L-shaped, 66″ island, breakfast nook	10-ft island facing the garden, centred range wall, walk-in scullery
Geometry	45° walls at the stair, primary entry and railing	All walls orthogonal; every room symmetric on its own axis
Mudroom + laundry	Combined 5′-11″ × 8′-0″ room	8′-6″ × 6′-0″ mudroom with lockers; laundry upstairs
Primary suite	Entered on a diagonal from the hall	Double-door entry gallery, dressing room, spa ensuite
Baths	2.5	3.5 above grade, plus a guest bath below
Outdoors	Patio slider and step	21 × 12.5 ft covered loggia and a stone terrace
Finished lower level	1,102 sq ft	≈1,375 sq ft: lounge, bar, gym, guest suite, wine room
Area above grade	2,923 sq ft	≈3,330 sq ft on a similar 42 × 52 ft footprint

LOWER LEVEL

11 GUEST SUITE AND GYM
A guest suite with its own bath for parents or visitors, and a gym glazed to the lounge.

12 MEDIA LOUNGE
Under the great room: a 20 × 23 ft lounge with a media wall and wet bar.

13 WINE ROOM
Glass-walled, on the way from the stair to the lounge, with the games room beside it.

AREAS

Main floor	1,680 sq ft
Second floor	1,650 sq ft
Total above grade	**3,330 sq ft**
Finished lower level	1,375 sq ft
Garage (2 cars)	456 sq ft
Covered loggia	267 sq ft

- Original sizes scaled from the 2026 brochure. Areas to exterior faces, open-to-below excluded.
- The ≈400 sq ft gain is mostly the second floor over the garage; shorten the rear rooms 4 ft to return to 2,923.
- Concept only: verify zoning, building code and structure before working drawings.
