Hiring Committee, Project Manager Competition J0926-0704
Strategy and Partnerships, IT Services
Queen's University
99 University Avenue
Kingston, ON K7L 3N6

Dear Hiring Committee:

Subject: Application for Project Manager (Term), IT Services, Competition J0926-0704

Your IT Services projects reach every student, researcher, and staff member at Queen's, so each one needs a project manager who can hold scope, schedule, and budget steady while keeping very different stakeholders aligned. Please consider this application for the term position of Project Manager in IT Services (competition J0926-0704), posted on October 19, 2026. For more than three years, my work at The Metropolitan Museum of Art, the Denver Art Museum, the Smithsonian, and a Kingston non-profit has centred on exactly that kind of multidisciplinary delivery.

Your operating plan ties IT Services' work directly to the six goals of the Queen's Strategy, and your Delivery Management Office supports project managers with tailored industry best practices, tools, templates, and coaching. That disciplined framework matches the way I deliver: predictive planning combined with Agile practice, built through a Sheridan College graduate certificate in project management and Google and IBM Agile credentials. As a Queen's Master of Arts graduate and a current Master of Digital Product Management student at the Smith School of Business, I also rely on Queen's digital services as a student, so you would gain a project manager who already understands the people your projects serve.

Your projects would benefit from delivery discipline proven against immovable deadlines. At The Met, I coordinated collections and interpretation planning for the multimillion-dollar reinstallation of the Michael C. Rockefeller Wing, routing print and digital content through multi-stage reviews with five specialist teams and escalating schedule risks early; the wing reopened to the public on schedule in May 2025. At the Denver Art Museum, I managed print and digital deliverables across concurrent exhibitions with fixed opening dates, keeping results on schedule and within budget.

You would also gain a project manager who turns data into decisions. As Project Manager and Program Lead at Emole Futures Initiative in Kingston, I run four concurrent workstreams against a baselined budget, report variance through dashboards and executive summaries, and route scope changes to leadership while they are still small enough to absorb. My digital product management studies add the product and Agile perspective that IT projects require, from user stories and backlog refinement to roadmapping.

I would welcome the chance to discuss how this experience can help your team deliver its next portfolio of projects on time and on budget. Since I live in Kingston, a meeting on campus at a time that suits you is easy to arrange; please call 343-989-2373 or email teminicrownpro@gmail.com. Thank you for your time and consideration.

Sincerely,

Adekunle (Ade) Adeniji

Enclosure: Resume

PROFILE AND OBJECTIVE

Objective: Project Manager (Term), IT Services, Queen's University (Competition J0926-0704)

Project manager with more than three years of experience leading multidisciplinary projects with fixed, public deadlines for The Metropolitan Museum of Art, the Denver Art Museum, the Smithsonian, and a Kingston non-profit. Plans and controls scope, schedule, budget, risk, and stakeholder communication across concurrent workstreams, combining predictive and Agile methods. Turns delivery and budget data into dashboards and executive summaries that support informed decisions. Brings graduate training in project management, digital product management, and professional communication.

CORE COMPETENCIES

- **Scope and change control:** defined scope with executives and routed changes through leadership approval before they grew into overruns
- **Schedule and milestone management:** built milestone plans for four concurrent workstreams; kept The Met's Rockefeller Wing deliverables on track for its on-schedule May 2025 reopening
- **Budget and cost control:** baselined budgets, tracked actual spend against plan, and reported variance on a regular cadence
- **Risk and issue management:** identified risks and workflow gaps early and escalated them while there was still time to act
- **Stakeholder engagement:** aligned executives, specialist teams, community partners, and volunteers around shared scope and timelines
- **Agile and hybrid delivery:** applied Scrum, user stories, and backlog refinement alongside predictive planning
- **Reporting and evaluation:** produced dashboards and outcome summaries; designed and analysed a 27-question intake survey

EDUCATION

Ontario College Graduate Certificate, Advanced Communication for Professionals — In Progress
Fanshawe College, London, Ontario

Master of Digital Product Management — Expected 2027
Smith School of Business, Queen's University, Kingston, Ontario

Graduate Certificate, Project Management (Co-op) — 2026
Sheridan College, Ontario

Master of Arts, Art History — 2025
Queen's University, Kingston, Ontario

PROFESSIONAL EXPERIENCE

Project Manager and Program Lead — 2025 – Present
Emole Futures Initiative Inc., Kingston, Ontario

- Defined program scope, objectives, and deliverables with the executive team for the Black Youth in Business program, giving schools, mentors, and community partners one shared plan to work from.
- Built integrated plans, budget estimates, and milestone schedules across four concurrent workstreams, so every workshop, mentoring session, and public event had a clear owner and date.
- Directed end-to-end delivery by recruiting, scheduling, and supervising program assistants and volunteer mentors, routing each activity to the right facilitator so work reached the correct owner the first time.
- Engaged facilitators and suppliers against agreed scope and cost, verifying completion before payment so the program paid only for delivered work.
- Monitored actual spend against the baselined budget and escalated scope changes to leadership while they were still small enough to absorb.

- Identified delivery risks early, documented decisions and next steps from planning meetings, and applied quality review to facilitator output, keeping teams aligned on one plan.
- Presented dashboards and outcome summaries to executives and external stakeholders, and evaluated results through a 27-question intake survey whose findings shaped the next delivery cycle.

Project Coordinator, Arts of Africa (Curatorial Residency) January 2025 – July 2025
The Metropolitan Museum of Art, New York, NY | Samuel and Gabrielle Lurie Fund Residency

- Coordinated collections and interpretation planning for the multimillion-dollar reinstallation of the Michael C. Rockefeller Wing, contributing to its on-schedule public reopening in May 2025.
- Aligned five specialist teams (curatorial, conservation, registration, education, and design) on deliverables, securing approvals on content, timing, and display before deadlines.
- Tracked versions, milestones, and deadlines through multi-stage review cycles, keeping print and digital deliverables synchronized with the installation schedule.
- Documented decisions from cross-team planning meetings and escalated schedule risks early, giving senior staff time to resolve issues before they threatened the opening date.
- Researched and wrote gallery interpretation and three published Heilbrunn Timeline of Art History essays, and presented to staff and stakeholders, making complex material clear for varied audiences.

Exhibition Project Coordinator and Curatorial Fellow January 2022 – May 2023
Denver Art Museum, Denver, CO

- Coordinated deliverables and budgets across concurrent exhibitions with fixed opening dates, juggling competing priorities while tracking progress and expenses to keep results on schedule and within budget.
- Managed gallery labels, catalogue copy, and digital interpretive content from drafting through review and approval to final printed and published output.
- Communicated scope and schedule changes to curatorial, education, design, and registration partners, keeping every team aligned as plans shifted.
- Incorporated community advisor feedback into scope and content decisions, so exhibitions and public programs reflected the communities they served.
- Handled and installed sculpture, textiles, and works on paper to professional museum standards, protecting object safety in partnership with registration and conservation.

Project and Curatorial Intern July 2021 – November 2021
Smithsonian National Museum of African Art, Washington, DC

- Supported exhibition planning and public engagement across curatorial, conservation, and registration teams, applying federal-standard intake, documentation, and object-handling protocols to keep collection records complete and accurate.
