ADEKUNLE (ADE) ADENIJI

Kingston, Ontario | 343-989-2373 | teminicrownpro@gmail.com

PRODUCT MANAGER | DIGITAL PRODUCT MANAGEMENT

PROFESSIONAL PROFILE

Digital product management candidate at the Smith School of Business, Queen's University, with more than three years of experience delivering multidisciplinary digital, print, and community offerings for The Metropolitan Museum of Art, the Denver Art Museum, the Smithsonian, and a Kingston non-profit. Turns user and stakeholder research into clear problem statements, requirements, personas, and scenarios, then guides delivery to fixed launch dates using Agile and hybrid methods. Aligns executives, specialist teams, and partners around shared priorities, and uses survey data, dashboards, and outcome measures to decide what comes next. Pairs product thinking with project management discipline.

AREAS OF EXPERTISE

Product Discovery • User Research and Surveys • Problem Framing • Personas and Scenarios • Task Modelling
Functional and Non-Functional Requirements • Scope and System Boundaries • Data Dictionaries • Traceability
Product Lifecycle and Roadmapping • User Stories • Backlog Refinement • Agile and Scrum • Launch Planning
Stakeholder Alignment • Outcome Metrics and Dashboards • Cross-Functional Leadership • Generative AI for Product

PRODUCT COMPETENCIES

- **Discovery and user research:** intake survey design and analysis; personas, scenarios, and task models
- **Problem framing and requirements:** problem statements and testable functional and non-functional requirements
- **Scope and prioritization:** clear product boundaries, with scope changes routed through leadership approval
- **Agile and hybrid delivery:** Scrum, user stories, and backlog refinement alongside milestone planning
- **Data-informed decisions:** survey, delivery, and budget data turned into dashboards and next-cycle decisions
- **Stakeholder alignment:** executives, specialist teams, partners, and users aligned on shared priorities

PRODUCT PROJECT

PRISM Furniture Request: Requirements and Design (Team Project) 2026
MDPM 883 Designing the Digital Product, Smith School of Business, Queen's University

- Framed the core user problem for a Government of Alberta furniture request service: request records scattered across a work-order system, email, Teams, spreadsheets, and paper, leaving requesters unable to see what was happening with their requests.
- Defined the product scope and system boundary within the wider PRISM platform, separating what the product owns from procurement, warehousing, and installation work it only tracks, which kept design effort focused.
- Specified 26 functional and 19 non-functional requirements in the Volere structure, each written to be judged as met or not met, giving designers a testable specification.
- Co-developed hierarchical task models covering 86 tasks, seven activity scenarios, a seven-group data dictionary, and four personas, reconciling every artifact through a traceability review.
- Consolidated the team's research into the final deliverable, adding a service-staff task decomposition, a persona for the secondary user group, and measurable performance targets.

EDUCATION

Master of Digital Product Management Expected 2027
Smith School of Business, Queen's University, Kingston, Ontario

Ontario College Graduate Certificate, Advanced Communication for Professionals In Progress
Fanshawe College, London, Ontario

Graduate Certificate, Project Management (Co-op) 2026
Sheridan College, Ontario

Master of Arts, Art History 2025
Queen's University, Kingston, Ontario

PROFESSIONAL EXPERIENCE

Project Manager and Program Lead 2025 – Present
Emole Futures Initiative Inc., Kingston, Ontario

- Defined objectives, scope, and deliverables for the Black Youth in Business program with the executive team, translating the needs of schools, mentors, and community organizations into one documented plan.
- Designed and analysed a 27-question community intake survey to understand participant needs and measure outcomes against objectives, producing findings that shaped the next program cycle.
- Screened incoming partner and participant requests for completeness at intake, so work entered delivery ready to action instead of stalling on missing information.
- Planned and sequenced four concurrent workstreams of workshops, mentoring sessions, and public events, giving every activity a clear owner and date.
- Presented dashboards and outcome summaries to executives and external stakeholders, turning delivery and budget data into decision-ready reports.
- Monitored spend against a baselined budget and escalated scope changes while they were still small enough to absorb, protecting the program's agreed priorities.

Project Coordinator, Arts of Africa (Curatorial Residency) January 2025 – July 2025
The Metropolitan Museum of Art, New York, NY | Samuel and Gabrielle Lurie Fund Residency

- Coordinated collections and interpretation planning for the multimillion-dollar reinstallation of the Michael C. Rockefeller Wing, contributing to its on-schedule public reopening in May 2025.
- Aligned five specialist teams (curatorial, conservation, registration, education, and design) on deliverables, securing approvals on content, timing, and display before deadlines.
- Managed versions and milestones for print and digital content through multi-stage review cycles, keeping every channel synchronized with the launch schedule.
- Researched and wrote gallery interpretation and three published essays for The Met's online Heilbrunn Timeline of Art History, translating complex material into clear, accessible content for varied audiences.
- Documented decisions from cross-team planning meetings and escalated schedule risks early, giving senior staff time to resolve issues before they threatened the opening date.

Exhibition Project Coordinator and Curatorial Fellow January 2022 – May 2023
Denver Art Museum, Denver, CO

- Managed digital interpretive content, gallery labels, and catalogue copy across concurrent exhibitions with fixed opening dates, from drafting through review and approval to published output, keeping results on schedule and within budget.
- Incorporated community advisor feedback into scope and content decisions, so exhibitions and public programs reflected the audiences they served.
- Communicated scope and schedule changes to curatorial, education, design, and registration partners, keeping every team aligned as plans shifted.

Project and Curatorial Intern July 2021 – November 2021
Smithsonian National Museum of African Art, Washington, DC

- Supported exhibition planning and public engagement across curatorial, conservation, and registration teams, applying federal-standard documentation protocols to keep collection records complete and accurate.
