Hiring Committee, Associate Product Manager
Verification Strategy & Credentials
Interac Corp.
200 Bay Street, Suite 2400
Toronto, ON M5J 2J1

Dear Hiring Committee:

Subject: Application for Associate Product Manager, Verification Strategy & Credentials

Your Verification team is building something Canadians will rely on more every year: a way to prove who they are online that is as trusted as an Interac e-Transfer. Please consider this application for the position of Associate Product Manager, Verification Strategy & Credentials, in Toronto. Your portfolio needs a product manager who can turn user needs into testable requirements and then see them through a disciplined release; my graduate training in digital product management and more than three years of fixed-deadline delivery prepare me to do both.

Interac's recent momentum shows why this role matters now. Fiscal 2025 opened your three-year strategy to double Interac's lines of business, and Interac e-Transfer processed 1.6 billion transactions that year, including a record 149 million in October. In 2026, your agreement with Incode brought new document verification technology to Interac Verified, the Kijiji partnership extended verification into peer-to-peer marketplaces, and National Bank of Canada joined the Interac Verification Service. Each step raises the questions your posting puts at the centre of this role: scale, adoption, security, and interoperability.

Your team would gain someone who already designs in those terms. In my Smith School of Business team project for a Government of Alberta digital service, we co-wrote 26 functional and 19 non-functional requirements, each testable as met or not met, including role-based access, mandatory documents by request type, and duplicate detection. The service had to inherit identity and organizational data from a shared platform rather than re-create it, and our personas and task models separated infrequent users, who must relearn a process each time, from experienced high-volume users. That distinction sits at the heart of adoption for any verification product.

You would also gain delivery discipline and a habit of measuring results. At The Metropolitan Museum of Art, I routed print and digital content through multi-stage review and approval cycles for the multimillion-dollar Michael C. Rockefeller Wing reinstallation, which reopened on schedule in May 2025; the same rigour applies to product testing and quality checks. At Emole Futures Initiative in Kingston, I screen incoming requests for completeness, track outcomes through a 27-question survey of my own design, and report results through dashboards that shape the next cycle.

I would welcome the chance to discuss how this experience can support your roadmap for document verification and digital credentials. I would be glad to meet by video or in person at a time that suits you; please call 343-989-2373 or email teminicrownpro@gmail.com. Thank you for your time and consideration.

Sincerely,

Adekunle (Ade) Adeniji

PRODUCT MANAGER | DIGITAL PRODUCT MANAGEMENT

PROFILE AND OBJECTIVE

Objective: Associate Product Manager, Verification Strategy & Credentials, Interac Corp.

Digital product management candidate at the Smith School of Business, Queen's University, with more than three years of experience delivering multi-stakeholder digital, print, and community offerings for The Metropolitan Museum of Art, the Denver Art Museum, the Smithsonian, and a Kingston non-profit. Turns user research into testable requirements, personas, and task models, including role-based access, document, and duplicate-detection requirements for a government digital service. Brings rigorous review and quality-check habits from fixed-date launches, and uses survey data, dashboards, and outcome measures to decide what comes next.

AREAS OF EXPERTISE

Product Discovery • User Research and Surveys • Problem Framing • Personas and Scenarios • Task Modelling
Functional and Non-Functional Requirements • Role-Based Access Requirements • Data Dictionaries • Traceability
Product Roadmapping • User Stories • Backlog Refinement • Agile and Scrum • Quality Checks and Review Cycles
Adoption and Outcome Metrics • Stakeholder Alignment • Shared-Data Integration • Generative AI for Product

PRODUCT COMPETENCIES

- **Discovery and user research:** intake survey design and analysis; personas, scenarios, and task models
- **Requirements and access control:** testable functional, non-functional, and role-based access requirements
- **Quality checks:** multi-stage review and approval cycles completed before every public release
- **Agile and hybrid delivery:** Scrum, user stories, and backlog refinement alongside milestone planning
- **Data-informed decisions:** survey, delivery, and budget data turned into dashboards and next-cycle decisions
- **Stakeholder alignment:** executives, specialist teams, partners, and users aligned on shared priorities

PRODUCT PROJECT

PRISM Furniture Request: Requirements and Design (Team Project) 2026
MDPM 883 Designing the Digital Product, Smith School of Business, Queen's University

- Framed the core user problem for a Government of Alberta furniture request service: records scattered across a work-order system, email, Teams, spreadsheets, and paper, leaving requesters unable to see what was happening with their requests.
- Defined the product scope within the wider PRISM platform, inheriting identity, building, and organizational data from PRISM Core instead of re-creating it, which kept shared data consistent across services.
- Co-wrote 26 functional and 19 non-functional requirements in the Volere structure, including role-based access, mandatory attachments by request type, and duplicate detection, each testable as met or not met.
- Co-developed 86-task hierarchical task models, seven scenarios, a seven-group data dictionary, and four personas, separating infrequent from high-volume users to guide adoption-focused design.
- Consolidated the team's research into the final deliverable, adding a service-staff task decomposition, a persona for the secondary user group, and measurable performance targets.

EDUCATION

Ontario College Graduate Certificate, Advanced Communication for Professionals In Progress
Fanshawe College, London, Ontario

Master of Digital Product Management Expected 2027
Smith School of Business, Queen's University, Kingston, Ontario

Graduate Certificate, Project Management (Co-op) 2026
Sheridan College, Ontario

Master of Arts, Art History 2025
Queen's University, Kingston, Ontario

PROFESSIONAL EXPERIENCE

Project Manager and Program Lead 2025 – Present
Emole Futures Initiative Inc., Kingston, Ontario

- Defined objectives, scope, and deliverables for the Black Youth in Business program with the executive team, translating the needs of schools, mentors, and community organizations into one documented plan.
- Screened incoming partner and participant requests for completeness at intake, so work entered delivery ready to action instead of stalling on missing information.
- Designed and analysed a 27-question community intake survey to understand participant needs and measure outcomes against objectives, producing findings that shaped the next program cycle.
- Planned and sequenced four concurrent workstreams of workshops, mentoring sessions, and public events, giving every activity a clear owner and date.
- Presented dashboards and outcome summaries to executives and external stakeholders, turning delivery and budget data into decision-ready reports.
- Monitored spend against a baselined budget and escalated scope changes while they were still small enough to absorb, protecting the program's agreed priorities.

Project Coordinator, Arts of Africa (Curatorial Residency) January 2025 – July 2025
The Metropolitan Museum of Art, New York, NY | Samuel and Gabrielle Lurie Fund Residency

- Coordinated collections and interpretation planning for the multimillion-dollar reinstallation of the Michael C. Rockefeller Wing, contributing to its on-schedule public reopening in May 2025.
- Aligned five specialist teams (curatorial, conservation, registration, education, and design) on deliverables, securing approvals on content, timing, and display before deadlines.
- Managed versions and milestones for print and digital content through multi-stage review cycles, keeping every channel synchronized with the launch schedule.
- Researched and wrote gallery interpretation and three published essays for The Met's online Heilbrunn Timeline of Art History, translating complex material into clear, accessible content for varied audiences.

Exhibition Project Coordinator and Curatorial Fellow January 2022 – May 2023
Denver Art Museum, Denver, CO

- Managed digital interpretive content, gallery labels, and catalogue copy across concurrent exhibitions with fixed opening dates, from drafting through review and approval to published output, keeping results on schedule and within budget.
- Incorporated community advisor feedback into scope and content decisions, so exhibitions and public programs reflected the audiences they served.
- Communicated scope and schedule changes to curatorial, education, design, and registration partners, keeping every team aligned as plans shifted.

Project and Curatorial Intern July 2021 – November 2021
Smithsonian National Museum of African Art, Washington, DC

- Supported exhibition planning and public engagement across curatorial, conservation, and registration teams, applying federal-standard documentation protocols to keep collection records complete and accurate.
